LFE8 Remote Signage Solution without STB by Multi Monitoring Control Software!

◆ **USB Media Player** - Simple Signage Display without Set top box

USB memory

Easy to update the contents / Scheduling!

LAN

Built-in USB Media Player enables automatic video and still-image playback via USB memory without Set-top box or PC.

You can also compile scenario files to designate the playback order and time.

NEW **Content Delivery Function by Multi Monitoring Control Software**

Also, Multi Monitoring & Control Software makes it possible to change the content in the USB memory via LAN after installation.
Content can be easily changed even when the display is installed in a high place or suspended from the ceiling.
This function is the same as LF8/80 series.
