

PRO PTZ CAMERA OUTDOOR ENCLOSURES

Don't let the weather keep you from capturing high-quality video using robotic cameras. Simply pair your Panasonic PRO PTZ remote cameras with our specialized lineup of rugged outdoor camera housings and install them exactly where needed. This selection of robotic camera enclosures will fit virtually any connectivity need you may have and any weather condition you may encounter, making professional multi-camera video production more accessible than ever.

These protective outdoor housings are specially designed to protect Panasonic PRO PTZ robotic cameras from the harshest environmental conditions without major impact to video quality and transmission. The vandal-proof remote camera enclosures are ideal for stadiums, arenas, outdoor tracks, sports fields, training grounds, live remote news broadcasts / live shots, reality TV shows, and other installs with challenging environmental conditions.

OUTDOOR PRO PTZ CAMERA HOUSING WITH HEATER

These camera housings feature a built-in heater-blower system to shield the camera from cold temperatures and to keep the viewing window from fogging up in humid conditions.

- Made from lightweight, impact-resistant polycarbonate thermal plastic, will not rust or corrode
- Features advanced integrated thermostatically controlled heater-blower system
- IP66 rated, airtight and sealed against outside dust, water & salt water air
- IP68 waterproof rated connection ports
- Tested and designed by Dotworkz for direct compatibility with select Panasonic PRO PTZ cameras

MODEL	HOUSING TYPE	FEATURES	LIST PRICE
PAN-D2-HB	Outdoor / Heater-Blower System	Standard	\$1,559.00
PAN-D2-HBF	Outdoor / Heater-Blower System	with FIDO (fiber)	\$3,845.00

Compatible with AW-UE70 / AW-UN70 / AW-HE42 / AW-HE40S / AW-HE40H / AW-HN40 / AW-HE38 / AW-HN38

MODEL	HOUSING TYPE	FEATURES	LIST PRICE
PAN-HD12-HB	Outdoor / Heater-Blower System	Standard	\$4,545.00

Compatible with AW-UE150 / AW-HE130 / AW-HN130

OUTDOOR PRO PTZ CAMERA HOUSING WITH COOLING

This camera housing features a built-in active cooling system to prevent overheating in temperatures above 105°F and as high as 158°F. The enclosure lets the camera function flawlessly, even when subjected to soaring temperatures and direct sunlight. The solid-state cooling system and high-flow fans remove heat without air exchange into the sealed housing, thus controlling humidity that can cause lens fogging and component corrosion.

MODEL	HOUSING TYPE	FEATURES	LIST PRICE
PAN-D2-CD	Outdoor / Cooling System	Standard / 12v Power	\$2,795.00
PAN-D2-CDF	Outdoor / Cooling System	with FIDO (fiber) / 12v Power	\$5,387.00
