The LFE8 Series is often used vertically for menu boards inside the store, and increases mounting possibilities. This provides information that is easy to see even in relatively high places. The LFE8 Series is applicable for menu boards, floorstanding displays, and town guide displays, and can be mounted in landscape, portrait, or multi-screen configuration. This provides a wide variety of original signage content that can be used.

### Convenient Cloning for Same-size, Multi-Display Operation

Connecting more than one unit with LAN cable reproduces files in USB memory simultaneously. Using a USB memory device connectable to this unit, USB media from one unit can be played on all other units. Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB extension cable. The maximum memory size of USB is 32 GB. Devices not formatted with FAT16 or FAT32 cannot be used. Devices with security feature are not supported.

### Choose the Installation to Match Your Application

Depending on the type of display environment, the LFE8 Series supports wall mounting, ceiling mounting, table top mounting, and In-wall installation. This makes it possible to add flexibility to your installation options. Optional accessories are available at www.panasonic.net/prodisplays/accessories/.

### Simple Signage Operation with No Set-top Box

Both videos and still images can be displayed, so a wide operation is possible by simply inputting the desired memory device.

### Other Features

- **USB Media Player**: Signage operation is possible without a set-top box. A variety of original signage content can be used.
- **Simple Signage Operation**: Operation is possible by simply inputting the desired USB memory device.
- **Convenient Cloning for Same-size, Multi-Display Operation**: Files in USB memory can be simultaneously reproduced using a LAN connection.
- **Data Cloning**: Saves the files stored in USB memory into the display's internal memory for data cloning.
- **Multi Monitoring & Control Software**: Multi-monitoring and control software is available.
- **SS-CP**: SS-CP is used for the multi-screen configuration.
- **Remote Control**: Allows input lock, input search, input priority, and input priority.
- **Input Priority**: Input priority can be changed from display to display.
- **Input Lock**: Enables input lock.
- **Color Bar Test Pattern**: Used for display performance checks.
- **Menu Board**: For menu boards.

Stylish LFE8 Professional Displays Hit the Cost-to-Performance Sweet Spot

For more information about product specifications, please visit: http://panasonic.net/prodisplays/download/specsheets02.html

Environmental temperature to use this unit at high altitudes (1400 m (4593 ft) and higher and below 2800 m (9186 ft) above sea level): 0 °C to 35 °C (32 °F to 95 °F)

Weights and dimensions shown are approximate. Specifications and appearance are subject to change without notice. Product availability differs depending on region and country. This product is a professional display and is not recommended for household use.
**Signage Use**

This series meets a diversity of needs, from single-unit use in stores/systems in large-scale facilities. 2 x 2 image in almost the same space.

**Installation Use**

The LFE8 Series models are available in 6 sizes to match the installation space. They also feature built-in speakers for convenience in intercom/conferencing. The narrow bezels help viewers concentrate on the screen image.

**Convenient Functions for Digital Signage Use**

In addition to enabling a wide variety of mounting configurations, such as portrait, landscape, and tilting, the LFE8 Series is equipped with terminals that allow remote operation and control. This series needs a diversity of needs, from single-unit use in stores/system/office to large-scale facilities. 2 x 2 image in almost the same space.

**Convenient Functions for Conference Display Use**

CONVENIENT FUNCTIONS FOR CONFERENCE DISPLAY USE

**Stand-alone Operation Saves Labor by Making Content Changes Over a Network**

Multi-Monitoring & Control Software Compatible

This 5.1-channel surround sound system is particularly suited for changing the content in the USB memory via LAN file. The content can be easily changed even when the display is included in a group or suspended from the ceiling. This realizes smooth, easy operation.

**A LAN Control function for Internet-based control**

This function is highly convenient for remote management in multiple displays. Control is performed from a PC over a LAN network. Internal functions allow LAN control to be used even if the LAN function is not supported. Furthermore, this function allows troubleshooting if an error should occur, for remote maintenance.

**Various input terminals meet the needs for professional use**

Input terminals include HDMI, DVI, VGA, and USB. Control terminals include a LAN terminal, SERIAL, and IR. As a result, a wide variety of input/output is possible, while maintaining the same external appearance. As a result, the terminal is less likely to change when using the display. This function allows LAN control to be used even if the LAN function is not supported. Furthermore, this function allows troubleshooting if an error should occur, for remote maintenance.

**Increased Signal Support for a Wide Variety of Content**

Simultaneous Play of Multiple Displays

**Improving Conveniences and Saving Energy with Power Management**

The LFE8 Series supports Multi Monitoring & Control Software for Internet-based control. In addition, the power is automatically turned on at a fixed time if the LAN function is supported. Furthermore, if the LAN function is not supported, a LAN terminal can be used. As a result, the terminal is less likely to change when using the display. This function allows LAN control to be used even if the LAN function is not supported. Furthermore, this function allows troubleshooting if an error should occur, for remote maintenance.

**Multilingual Display**

Displays are available in five languages: English, Chinese (Simplified), Chinese (Traditional), French, and Spanish. The display can be set to display the language that meets the needs of the viewer.

**Download Software from the Global Website**

http://panasonic.net/prodisplays/download/software/index.html

* Depending on the production period, some products don't support this function. Please check Multi Monitoring & Control Software.

* 0-20 degrees forward with landscape setting.
