

PANASONIC

SECTION 508 Statement

Panasonic continues to be inspired and led by the business philosophy of the company's founder, Konosuke Matsushita, that a company is indebted to society for its existence. Based on this principle, we strive to contribute to the community and recognize our responsibility to foster progress and promote the general welfare.

Panasonic products have had access-friendly features for many years. We strongly believe that everyone should be able to enjoy the benefits of accessible products. To achieve this goal, we endeavor to ensure that Panasonic products use all readily achievable means to make them ever more accessible to and usable by individuals with disabilities.

Panasonic understands that compliance with Section 508 is a new challenge facing all federal agencies. Therefore, we have adopted the GSA recommended format for reporting on our Section 508 features to help you simplify your product selection process. We have attached this template in response to your request and will also be publishing it on our website as well (www.panasonic.com/toughbook, go to industry section for federal).

We trust that providing information concerning the accessibility features of our products will satisfy your needs. If you have additional questions, please feel free to contact us at 1-800-662-3537 ext 3.
