

Speak to customers with clarity and improve order accuracy.

PANASONIC ATTUNE® II WIRELESS DECT DRIVE-THRU COMMUNICATION SYSTEM

Transform a noisy operation into an oasis of calm with the advanced digital noise reduction (DNR) and echo canceling technology from the leaders in drive-thru communication solutions.

Squelching noises doesn't have to be deafening to be distracting. We designed Attune II to block unwanted background noises like chatter, ice machines, and even outside sirens, airplanes and trains. So now your employees and customers can now hear each other - and nothing else.

SIMPLE AND EASY TO USE

Built to work seamlessly with your drive-thru operation, with just four buttons. Communication is simple and easy with one button to talk, one button to change volume, one button to page and only one button to change lanes to a second, optional lane.

Digital noise cancellation in a sleek and durable design.

DECT 6.0 Technology

Attune II use 4 levels of DNR to cancel ambient noise

Ergonomic & Sanitary Design

Weighing less than 120g with sanitary rubber pads, not foam

Regional Manager Headset

A single headset can be registered up to 32 different stores

Organized Operation Tags

Colored tags distinguish each unit by drive-thru lane

Panasonic Battery

Long-lasting reliability from the industry leader

ENHANCE YOUR DRIVE THRU OR CURBSIDE PICKUP

Dynamic Noise Suppression

Typical noise suppression eliminates low frequency, steady, hums like droning fans and idling freezers. Attune II suppresses all of those, plus sounds across the spectrum, including sounds that change in pitch and volume like sirens, beeping horns and kitchen chaos. Empower your staff members to speak with customers in a digitally enhanced quiet zone where they can communicate efficiently and get orders right the first time.

USE WITH EASE

Simplicity When Times are Hectic

Our headsets feature raised and tactile buttons that not only makes it easy to choose the button but also feel the proper click to confirm the selection.

ENVIRONMENTALLY CONSCIOUS DESIGN

Comfortable, Clean, and Eco Friendly

With a lightweight design at under 120g, the 457 Headset also features rubber pads which are easy to wipe down and keep sanitary, unlike foam pads.

Attune II is an environmentally conscious wireless headset system which allows sound transmission levels to utilize less power.
