DEPLOYMENT SERVICES

Are you looking to make it easier for IT and employees to get your mobile solutions up and running? We offer hands-on deployment services to ensure that your TOUGHBOOK mobile computers arrive in the field quickly and ready to work. We can design a deployment support package that is tailor-made for your environment, or provide specific services a la carte. With our deployment services, you get far more than a fleet of computers. You get customized systems that are fully integrated into your organization—the moment they land in your team's hands.

MOBILITY APPLICATION SERVICES

Do you need to maintain better control over devices and data? Keep devices in peak operating condition? Need tools to improve productivity in the field or manage compliance? Tackle the unique security challenges of mobile computers, device management and driver safety with software from leading partners that can be integrated before your computers are delivered or by you later in the field.

Which mobility application services can help you address your unique security and device management challenges?

WARRANTY COVERAGE

Avoid potentially catastrophic downtime by protecting your TOUGHBOOK laptops, tablets and handhelds. With a TOUGHBOOK warranty and our specialized repair services, you can speed repairs, better manage your budget, offload your internal staff from managing repairs and replacements, and prevent worker downtime. Combine coverage for even greater protection.

Additionally, your finance staff won't need to worry about funding unexpected repair costs (even for minor repairs) after deployment, helping them budget entire projects more predictably.
