

Complete tracking solution for assets, maintenance work and spare parts.

IMPROVE UPTIME, REDUCE OVERHEAD COSTS, AND INCREASE LIFETIME VALUE OF ASSETS.

ADAPTABLE TO NEARLY ANY INDUSTRY

Effective and easy-to-use solution for managing assets from purchase to disposal throughout your entire enterprise

Realize the efficiencies from locating and picking raw materials using scanning hardware and autonomous material delivery, while gaining inventory insights through detailed reporting.

FUNCTIONALITY THAT GROWS WITH CUSTOMER REQUIREMENTS

Present capabilities include:

- Proactive, planned and unplanned maintenance management
- Automate maintenance based on usage condition of assets
- Asset Location, Life-cycle Tracking and Work Order Management
- Integration Capabilities with 3rd party equipment and systems
- Resource management, including scheduling and certifications

KEY FEATURES & BENEFITS:

Scheduled & Unscheduled Maintenance

Increase equipment utilization and minimize downtime

Documentation Management

Save time centralizing documents and making them available when and where needed

Spare Parts Management

Reduce downtime due to parts stockout. Optimize spare parts inventory costs

Notifications & Dashboards

Provide real-time alerts and improve response time with notifications

User & Equipment Certification

Ensures compliance with laws, safety of personnel, quality of products, and life of the equipment
