

## Solving Your Material Management Challenges

### ELIMINATE REWORK AND MEET YOUR PRODUCTION DEADLINES WHILE REDUCING OPERATING EXPENSES AND DOWNTIME

Our suite of Material Management solutions connect your entire operation so you have the right materials exactly when you need them – without wasting labor setting up new jobs or locating supplies

#### REDUCE LABOR COSTS WHILE IMPROVING OPERATOR EFFICIENCY

Maintain optimal profitability by minimizing downtime stemming from staffing or material shortages

Realize the efficiencies from locating and picking raw materials using scanning hardware and autonomous material delivery, while gaining inventory insights through detailed reporting.

#### REDUCE RAW MATERIAL INVENTORY

PanaCIM's Material Control feature makes sure you have the right materials exactly when you need them

PanaCIM Material Control integrates with a vast portfolio of third-party hardware. Real-time reporting of raw material stock levels means you'll never run out of the goods you need to keep your operation running.

#### DATA DRIVEN DECISION MAKING:

##### Scrap Rate Reduction

Ensure materials received are within specification and setup properly in production to reduce scrap and rework

##### Seamless Integration

Optimize material flow and floor space throughout your operation through our network of partner solutions that automate material management tasks

##### Optimize Labor Scheduling

Decrease operating expenses by allocating labor efficiently

##### Materials Where and When You Need Them

Real-time dashboards allow you to view supply levels so you know what to order and where to send it

##### Reduce Working Capital

Minimize excess material purchases to mitigate the risk of production stoppages due to material management inefficiencies
