PANASONIC MOBILE SOLUTIONS ARE THE SMART ANSWER TO REAL BUSINESS PROBLEMS.

Select and configure your Panasonic TOUGHBOOK® device so workers have the capabilities they need.

Panasonic can help you plan, configure, test and deploy a mobile solution with the right features, software and services.

Make TOUGHBOOK Your Own

TOUGHBOOK rugged computers are exceptionally customizable and durable.

- Look for the MIL-SPEC and Ingress Protection (IP) certifications that have defined rugged mobile computing for over 20 years.

- Choose from a range of form factors: laptops, 2-in-1s and tablets running the Windows® operating system.

- Build your device into an on-the-job partner with our **online configurator**.

Businesses Are Going Mobile

42% of non-office-based workers in the U.S. are fully dependent on mobile devices.[1]

70% of new mobile and endpoint investments over the next five years will be for frontline workers.[2]

72% TOUGHBOOK rugged devices are 72% more reliable than other rugged devices, based on a comparison of device failure rates.[2]

Manage It Like a Boss

We offer a menu of software applications and tools, including mobile device management, application management software and integrated device security options such as fingerprint, insertable and contactless smartcard readers.

PROSERVICES

We've Got Your Back

Panasonic ProServices can help by augmenting your IT staff's resources. Plus, with our warranty services, you'll benefit from faster repairs and less downtime.

Our professional services enable you to design the support package that's right for your organization, including:

- Planning, testing and deployment of the right mobile technology
- Infrastructure assessment of your current setup and recommendations to optimize your TOUGHBOOK solution
- Field engineering onsite or remotely to troubleshoot mobility issues
- Employee ride-along services to observe firsthand how workers use their mobile devices
- Software management with complete solution services for your specific industry, asset management and security enhancements
- Engineering consulting to manage image creation, BIOS customization, battery management, in-vehicle mount installation and more
