

A Complete Family of Drive-Thru Solutions

EXCEED YOUR CUSTOMER'S EXPECTATIONS AT THE DRIVE-THRU.

The drive-thru operation has become a quick service restaurant's biggest source of revenue, accounting for over 70% of sales (QSR Magazine). To give customers the experience they expect, it's critical that every piece of technology works optimally together - which means crystal clear communication, accurate orders, and minimal wait times. That's why Panasonic Connect has created a family of next generation drive-thru solutions.

Your guests will be greeted with stunning visuals on Digital Menu Boards. They'll receive accurate orders and friendly service with the Attune HD Communications System. They'll even experience reduced wait times thanks to TOUGHBOOK® Line-Busting tablets and Stingray® Point-of-Sale Systems.

We also understand that ongoing support is essential to keep your drive-thru running smoothly. The Panasonic Connect Professional Services Group serves as your partner from installation and deployment to ongoing support and maintenance.

Innovation and Experience

We've been focused on creating technology that powers the quick service restaurant industry for over 40 years. It's this extensive experience that has enabled us to design the innovations that power the drive-thru of the future.

Flexibility to Design Your Ideal Environment

The Drive-Thru Solution by Panasonic Connect is designed to be flexible, enabling you to design a drive-thru strategy that meets your customer's unique needs.

Attune HD® Communications System

Stingray® Point-of-Sale Terminals

Line-Busting TOUGHBOOK® Tablets

Digital Menu Boards

Installation, Support & Maintenance

Panasonic CONNECT

A Family of Solutions that Redefines the Drive-Thru Experience

Attune HD® Communications System

The Attune HD® Drive-Thru Communications System delivers industry-leading sound quality. No more asking, “I’m sorry, can you repeat that?” With 4 levels of noise-canceling technology, your staff will hear customer orders—and nothing else. When communications are this clear and easy to understand, you’ll see improved order accuracy and friendlier interactions with your guests. Plus, the Regional Manager Headset Feature allows you to proactively interact with crew members without having to enter the store.

- Increase Order Accuracy
- Enhance Customer Satisfaction
- Improve Speed of Service

Stingray® Point-of-Sale Solutions

Our Stingray® Point-of-Sale Terminals have a legacy that spans over 40 years. Thanks to unmatched durability and reliability, they have become the workhorse of the quick-service restaurant industry. This experience has enabled us to develop a family of versatile point-of-sale terminals designed to meet the heavy demands of today's drive-thru lanes.

- Flexible Configuration
- Unmatched Durability
- Software Agnostic

Line-Busting TOUGHBOOK® Tablets

Deploying the line-busting, fully rugged TOUGHBOOK® allows crew members to reduce the wait time and speed up the entire ordering process in the drive-thru lane. The earlier your staff engages with guests, the more likely they are to remain in the drive-thru lane.

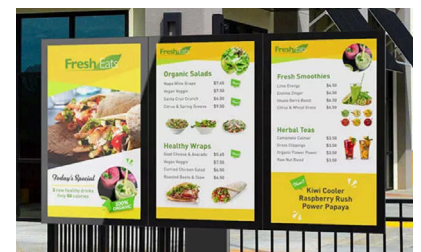

- 18 Hour Battery Life
- 1,000 Nit Brightness for Use in Sunlight
- Software Agnostic
- Weather-resistant to Work in Rain

Digital Menu Boards

Promote your restaurant's offerings with rich content on vivid, eye-catching displays. A digital menu board offers an engaging experience from the moment your guests arrive. Your operation will experience increased order accuracy and reduced wait times thanks to your customers' ability to easily read and confirm their order.

- Weather-resistant Outdoor Digital Signage
- Easy-to-Update, Dynamic Content
- Dayparting
- Brilliant display

Installation, Support & Maintenance

Panasonic Connect Professional Services Group has installed, deployed, and supported a wide range of drive-thru technology. Whether we're setting up a single location, multiple locations across the country, or engaging in long-term service and support, you can count on the industry's most reliable teams to provide a seamless experience.

- Installation & Deployment Services
- Service Depot & Repair Center
- Data Analytics
- Call Center – 24/7/365
- Managed Professional Services
