

Professional Services: Deployment Onsite & Remote Assisted Hardware Deployment

CONNECTED ORGANIZATIONS RELY ON PANASONIC CONNECT

Optimize your workers' productivity with hardware configuration and deployment services from Panasonic Connect. Our team of technicians work closely with you to plan, test, and deploy the right hardware to keep your organization running seamlessly.

We provide a variety of configuration and logistical support services, like preparing your devices with stress tests, imaging, customizations, and cataloging. You'll receive hardware that is field-ready right and fully integrated into your organization the moment it arrives.

From our Customer Service Center, a U.S.-based network of engineers and industry experts will help manage your deployments – whether it's a single location or multi-site rollout. Technicians are available 24/7/365 to coordinate onsite or remote deployments, and troubleshooting.

Partnering with Panasonic Connect means you'll work with the industry's most experienced, reliable deployment team. We'll be at your side every step of the way, providing set-up, preventative maintenance, and custom solutions.

PROFESSIONAL SERVICES

Configuration Services

Set up your hardware to be field-ready right out of the box.

Kitting Services

Assembly of multi-vendor accessories, performance testing, and distribution of your final customized hardware solution.

Image Management

We'll catalog your gold image(s) and as you make changes, the latest version is deployed.

Personalization

Your organization's logo is affixed to your devices for increased brand awareness with customers.

Deployment Report

Creation of customized, detailed reports for each device so you can track assets and warranty renewals.
