

LAW ENFORCEMENT INSIGHTS: Challenges, Priorities, and Technology Solutions

We surveyed law enforcement leaders to find out their top challenges and priorities. Here's what they told us.

Leaders say staffing is their top concern.

When asked about their biggest challenges:

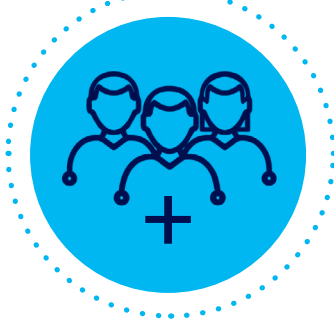

83%

say recruiting, staffing, and retention is a top challenge.

That's a **3.8% increase** in those concerned about recruiting, staffing, and retention since 2022.

94%

are concerned about current staffing shortages.

74%

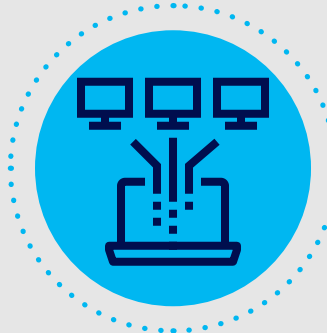

see value in staff augmentation services.

Agencies can turn to last mile delivery and deployment and tailored, professional services that streamline tasks and maximize productivity.

Leaders are prioritizing technology that improves the officer experience.

When evaluating a technology partner:

They also want technology that will:

83%

want seamless software integration.

Streamline manual tasks

Facilitate data-driven decision-making

Enhance real-time communications

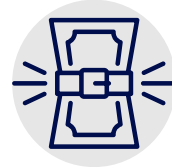

Provide situational awareness applications

Agencies should consider engaging a trusted partner to create a technology stack that meets officer needs, **makes projects more manageable**, and **enhances overall efficiency on the job**.

Leaders want solutions that can help them navigate digital transformation challenges.

However, the barriers they need help overcoming include:

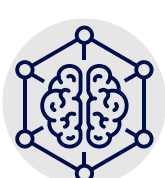

Budget constraints

Inadequate IT resources

Training & skills development challenges

Limited knowledge of new solutions

With access to **hardware, software, and services** designed specifically for law enforcement, as well as programs that help with grants and payment options, agencies can have peace of mind knowing they're able to **provide technology that best supports officers on the job**.
